Meeting Face to Face

In June 2005 six senior Iraqi trade union leaders toured the United States hosted by U.S. Labor Against the War, visiting 25 cities and speaking to several thousand unionists, peace activists, and others. This documentary captures the energy and emotions of the tour while expressing the important substantive message Iraqi workers want to convey to all Americans: end the occupation; oppose the privatization of Iraqi national resources; and support the right of all Iraqi workers to organize free and independent trade unions.
